CAREER OBJECTIVE

Hard-working currently studying Full Stack Web Development at Lambda School Online, with 3.5 years of work experience. Aiming to leverage a proven knowledge of Front End and Back End skills to successfully fill the Computer Programming role at your company. Frequently praised as focused by my peers, I can be relied upon to help your company achieve its goals.

PROFESSIONAL EXPERIENCE

COMPUTER TECHNICIAN MANAGER

Sycamore International, West Grove, PA / Dec 2015 - May 2019

- Refurbished and Recycled Form Factors ranging from PC's to Phones.
- I managed a small group of Computer Technicians and would organize, diagnose issues, and train employees
- Worked with hardware from both Apple and Microsoft

PROJECTS

DIDACT

A hub of online learning, Didact aims to learn as a community.

Tech Stack: Node.js, Express, React, Redux, Material UI, and Passport.js

- Built to the specifications of the stakeholder.
- A Lambda Labs project created with 6 UI Developers and 1 UX developer in a 2 month timeframe.
- Focused on front-end development with React and Redux, with drag-and-drop functionality and Udemy integration.

ANDREW NADU RESTORATION

A restoration portfolio showcasing masonry and restoration projects.

Tech Stack: HTML, LESS, Javascript

- Built to the specifications of the owner.
- An individual project, both developed and designed the layout.

Java Backend

Back End created to store restaurant information and users

Tech Stack: Java, Spring, OAuth2

- Built to connect to a Front End project.
- A Lambda Build week project, I was the only Back End Developer.
- Focused on maintaining the information sent from Front End, used OAuth2 authentication, with 72 tests tracking every endpoint.
