CAREER OBJECTIVE

I am looking for a Full Stack Web or Front-End position. My strengths are in React, Redux, and Javascript, with knowledge of Java, Node and Python.

PROJECTS

DIDACT

A hub of online learning, Didact aims to learn as a community.

Tech Stack: Node.js, Express, React, Redux, Material UI, and Passport.js

- Built to the specifications of the stakeholder, created with 6 UI Developers and 1 UX developer in a 2 month timeframe.
- Focused on front-end development with React and Redux, with drag-and-drop functionality, Material UI styling library.
- Contributed with Node Express endpoints, documentation as well as front-end intergration with Udemy's courses.

ANDREW NADU RESTORATION

A restoration portfolio showcasing masonry and restoration projects.

Tech Stack: HTML, LESS, Javascript

- An individual project, built to the specifications of the owner, used as a portfolio of their work.
- Focused on the core of computer languages, using HTML and LESS for the framework and styling.
- Created multiple reusable Javascript components for portfolio carousels and smooth mobile integration.

JAVA BACKEND

Back End created to store restaraunt information and users

Tech Stack: Java, Spring, OAuth2

- Built to connect to a Front End project, only Back End Developer.
- Used Spring, PostgreSQL as the database, with OAuth2 authentication for securing user data.
- Focused on mantaining the information sent from Front End, with 72 tests tracking every endpoint.

PROFESSIONAL EXPERIENCE

COMPUTER TECHNICIAN MANAGER

Sycamore International, West Grove, PA / Dec 2015 - May 2019

- Refurbished and Recycled Form Factors ranging from PC's to Phones.
- Managed a small group of Computer Technicians and would organize, diagnose issues, and train employees
- Worked with hardware from both Apple and Microsoft
